Plant Health Alternatives LLC, founded 2002, with global mission:

- (1) inspire people to respect trees and plants as life forms and take action according to that high level of respect,
- (2) strengthen trees by repairing their internal functionality,
- (3) change people’s practices and transform their consciousness to come from tree or plant’s point of view
- (4) reverse negative effects of climate change & pollution on trees and the planet’s forests

### Our Vision for the Future

- People appreciate the direct & indirect value of trees.
- People recognize Life Force and energy in trees & plants; taking appropriate actions.
- People work with Growth Energy of the trees and plants to care for them ‘from the tree’s and plant’s point of view.’
- People recognize that sick/declining trees/plants have poorly functioning internal parts and systems that can be repaired.
- Trees previously weakened by global climate change or pollution have renewed strength. Stronger trees and plants are able to naturally resist diseases and insects.
- Humans have learned the value and have the means to help diseases and insects co-exist with trees and plants.

### Services, Products, Initiatives:

- Provides new kinds of holistic, alternative professional on-site services. Reverses decline. Strengthens/heals sick trees/plants. No-Product GREEN, Holistic Energy Healing System.
- Innovates new solutions to global warming: reverses weakening effects of climate changes and pollution on forests.

- Offers learning experiences, information & skills.
- Offers books and other educational materials.
- Does philanthropic, “planetarian” works encouraging respect for plants as life forms...for the good of people and the planet.

### The Benefits

**For Trees, Plants & Forests : healthy inside-out!**

- Saved! Strengthened! Respected! Stress, decline, injury are reversed—becomes healthy, grows robust.
- Naturally resists diseases & insects. • Trees are unharmed; less need for invasive techniques or chemicals.
- Can reach full potential, look better, live longer.

**For People: happy with trees & prof'l services.**

- Saved time, money, work, worry • Satisfaction • Personal well-being
- Trees not cut down so valuable landscape remains intact.
- Is the underpinning to other care practices. • Old trees look better, live longer. • Beautiful scenery. • Legacy

**For Planet: stronger forests, cooler, less carbon, more oxygen.**
